

To whom it may concern

Ladies and gentlemen,

The year 2017 is declared the Year of Science and Education of Great Britain and Russia.

To mark this event, we have timed the release of new solid soap bases from the MELT & POUR series, made from natural plant material with an economical price, and free from the surfactant sodium lauryl sulfate (SLS Free):

- Crystal R SLS Free - transparent soap base
- Crystal R WSLS Free - opaque soap base

The letter "R" in the name of the new soap bases emphasizes that these products were specially developed for Russia.

By this letter Stephenson Personal Care confirms the production of these soap bases at our UK factory.

Yours faithfully,

Peter Ellis  
Director of Business Development
